

UnitedHealthCare Choice Plus Network Providers for Breast Pumps

PCL Medical Plans (A, B, C and Hourly) cover breast pumps for breast-feeding mothers who are covered under our plan. The pump will be covered at 100% (not subject to deductible) when purchased through a UnitedHealthcare Choice Plus provider (see list below) within 30 days of expecting a baby or 30 days after.

To order a pump, the participant can call one of the nationally contracted providers below, provide their UMR Medical ID# and let them know we are covered under the UnitedHealthCare Choice Plus network. The pump will be processed like a normal claim through UMR.

Most feedback from participants who have utilized this service has been positive so far. Specifically, Byram Healthcare has been highlighted as very easy to work with. If the participant has any problems or questions regarding their coverage under the plan, they can contact UMR at the number on the back of their ID card, 1-800-826-9781
